

Volunteer Opportunity: IT Support

Green Cross Australia helps people adapt to our changing climate in ways that embrace sustainability and community resilience. We believe we must help each other in order to help our planet and foster a global values shift towards a peaceful, secure and sustainable future.

Our programs support communities to become more empowered and resilient as we prepare for, and respond to, environmental change including severe weather events. We convene business, government, research and community partnership to catalyse large projects that advance our mission.

We're a highly awarded, not for profit, digital organisation and have won eight major awards for content, design and social media interface. We work with respected and credible partners to ensure that the content on our websites is rich and powerful.

We are currently looking for an IT expert (experience with Apples products essential) who is able to volunteer 1 to 2 days a week for IT support. Tasks would include general maintenance of individual machines and network server as well as assistance with technical systems support. If you feel that you have the skills to fulfil this role and a passion to contribute your time to our vision, please contact Megan and info@greencrossaustralia.org
